Flagstaff, AZ 86004

(919) 599-4380

US Work Authorization / Residency Status: US Permanent Resident (Green Card Holder)

HIGHLIGHTS	<ul style="list-style-type: none">- Multi-disciplinary data scientist and engineer with 17+ years of experience in computational methods- Leading the PhenoCam Data Team: 40+ million camera images + two million new images per month- Proficient in numerical analysis, data analysis, machine learning, image processing, and mathematical modeling- Proficient developer in multiple platforms and programming languages, e.g., R, Python, C/C++, Fortran, Shiny- Developed several R-packages on image processing, statistics, and data wrangling, with 30,000+ downloads- Developed several web-based geospatial and image processing applications based on R Shiny- Organized and taught technical quantitative workshops for lay and technical audience at professional meetings and universities- Strong writing skills as proven in over 20 publications in top peer-reviewed journals of quantitative topics- Strong communication skills as proven in presentations for lay and technical audience at professional meetings- Strong connections with the academic community in science and engineering in leading universities and national labs- Refereed 60+ articles for top peer-reviewed journals in quantitative science, modeling and remote sensing		
	EDUCATION	Ph.D. in Quantitative Environmental Science , Duke University, Durham, NC, USA	2017
		M.Sc. in Mechanical Engineering (Computational Methods) , Sharif University of Technology, Iran	2006
		B.Sc. in Mechanical Engineering (Numerical Modeling) , University of Semnan, Iran	2003
		Certificate: IBM Data Science Professional (9 Courses on Machine Learning and Visualization in Python and SQL)	2020
		Certificate: Data Science Foundations using R Specialization by Johns Hopkins University (5 Courses in R)	2016
	SKILLS	Programming and Scripting: <ul style="list-style-type: none">- R, Python, C/C++/C#, Markdown, MATLAB, Python, Mathematica, Java, VBA, Fortran, Pascal, Shell, HTML/CSS- Object Oriented Programming (OOP), High Performance Computing (HPC), Multithreaded Programming	
		Quantitative, Geospatial and Visualizations: <ul style="list-style-type: none">- Hierarchical Modeling, Bayesian Statistics, Markov Chain Monte Carlo (MCMC), Optimizations- Machine Learning, Deep Learning, Neural Network,- GIS, Geospatial Analysis, Remote Sensing, Data Elevation Model (DEM) Processing, Image Processing- ggplot2, data.table, dplyr, NumPy, SciPy, Pandas, Scikit-learn, Matplotlib, TensorFlow, Keras	
		Environmental Data Scientist / Geospatial Image Scientist Harvard University / Northern Arizona University (PhenoCam Network) <ul style="list-style-type: none">- Leading data management of the PhenoCam network, 40+ million images from 650+ sites around the globe- Designed data pipeline for translating raw data to curated, quality checked, and processed final products- Developed image/data processing routines in R/Python to extract meaningful insight from variety of data types including: Digital images, hyperspectral, Rasters, Shapefiles, JSON, geoJSON, LiDAR, surveyed data, HDF, ...- Developed Machine Learning methods and applied Deep Learning routines to extract insight from digital images- Regularly communicated with 250+ in-site scientists and technicians globally to assure high quality data stream- Developed web-based applications for interactive image processing and environmental science: DrawROI App: http://phenocam.nau.edu/drawroi/ Tree Ring Image Analysis and Database: http://phenocam.nau.edu/triad- Developed R packages including <i>xROI</i>, <i>solrad</i>, <i>phenocamapi</i>, <i>hazer</i> for data and image processing- Organized technical workshops on image processing and quantitative methods. e.g., https://www.neonscience.org/agu-2018-phenocam	
		Doctoral Research Assistant / Quantitative Environmental Scientist Duke University, Nicholas School of the Environment <ul style="list-style-type: none">- Designed and developed hierarchical models to study climate change impacts across the U.S. using satellite imagery- Developed nationwide drought monitoring interface using satellite data: https://bnasr.github.io/droughteye- Developed physics-based models (FoRM and GaRM) in C/C++/MATLAB to quantify energy fluxes in watersheds	
		Senior Researcher / Research and Development Engineer Research Institute of Petroleum Industry, Department of Energy and Environment, Iran <ul style="list-style-type: none">- Developed a 3D model of multiphase flow in porous media in C/C++ to simulate oil/gas reservoirs- Developed Energy Performance and Assessment Tools in C# to audit energy in power plants- Developed Pars Basin Modeler (PBM) in C/C++/Fortran to model sedimentary basins	
PROFESSIONAL EXPERIENCE			2017-now
			2011-2017
			2006-2011

AWARDS

NASA Advanced Information Systems Technology , National Aeronautics and Space Administration	2020
ESA Early Career Scholar Award , Ecological Society of America	2019
NEON Data Institute Fellowship , National Ecological Observatory Network	2018
Outstanding Accomplishments Fellowship , Duke University	2017
Pathfinder Fellowship , The Consortium for the Advancement of Hydrologic Science Inc. (CUAHSI)	2014
